

Which artists have the highest number of albums?

Iron maiden has by far made the most albums: 21 albums.

Interestingly, While there are 204 artists, only 6 of them have made more than 5 albums. While this is not shown in the graph, the vast majority of artists have made either 1 or 2 albums.

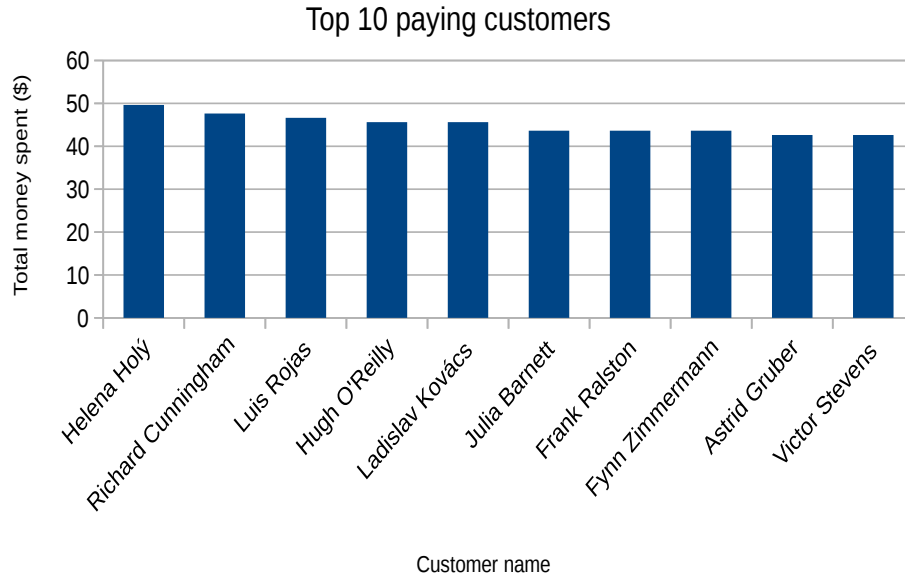

Which genres have the most releases?

As we can see in the graph, Rock is the genre that had the largest amount of track releases by quite a margin!

Although not visible in this graph, it is quite interesting to note that there is only one genre that had less than 12 tracks released: Opera. In fact, this genre had only 1 track released!

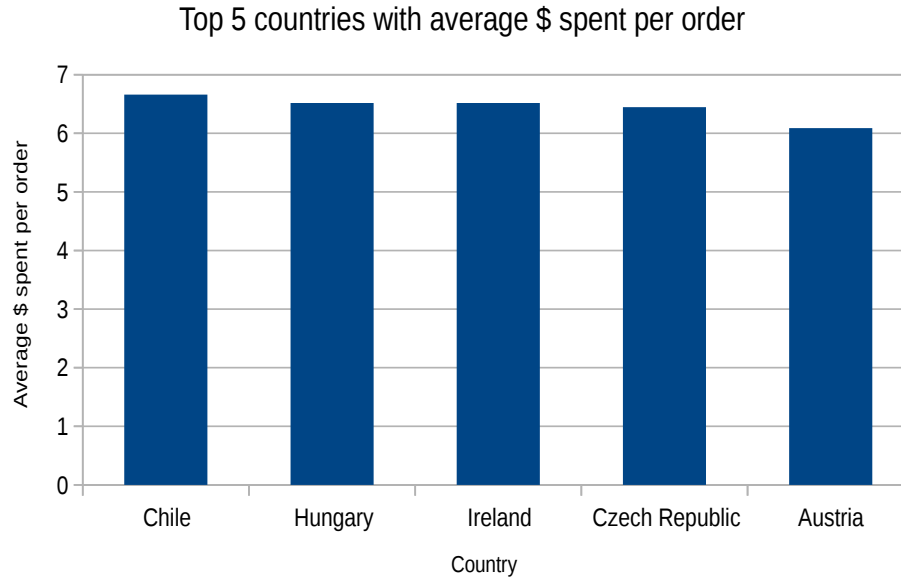

Which customers spent the most?

As the graph shows, the customer who spent the most, Helena Holý spent about 50 dollars.

As noted in the graph, there is not a huge difference between the amount customers pay for the top 10 customers. In fact, this trend continues for all customers as the customer who spent the least money (not shown) has spent 36.64 dollars.

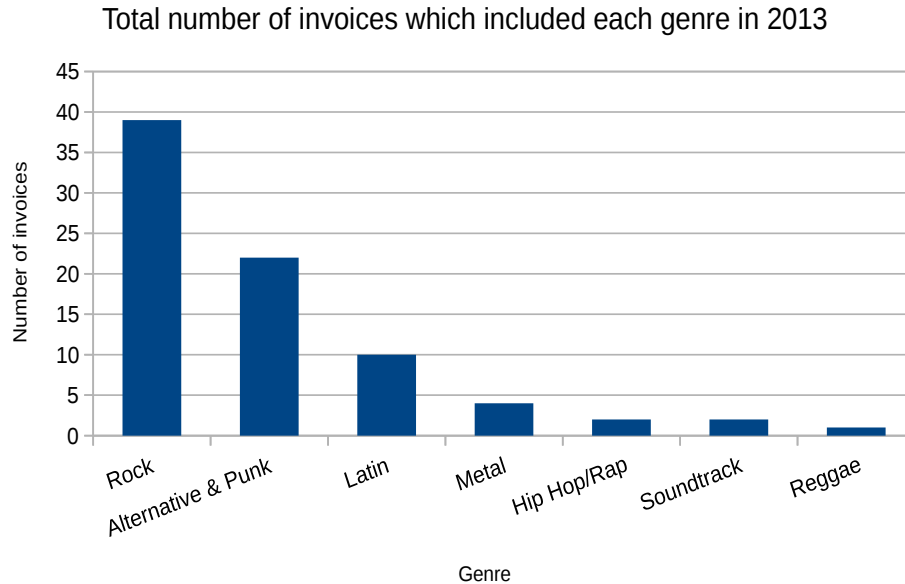

Which countries spent the highest \$ on average per order?

The countries on the graph are the countries which have customers who on average spent the highest amount of \$ per order.

It is very important to note however that this does not mean the customers in these countries spent the most in total! It just means that when someone buys from these countries it is more likely to be a big order.

Which genre sold the most in terms of quantity in 2013?

In 2013, Rock was by far the genre that most purchased the highest number of times.

Interestingly, this is graph includes all genres sold in 2013 – That means that all genres that are not on graph had no sales in 2013!
